BROCHURE**

VIOZ

ABOUT VIOZ ACADEMY

AT VIOZ Academy, we balance our training with 70% focus of practical and 30% focus on theory. The theory builds the knowledge foundation and with regular practice practical brings the actual art to the student

Theory

The trainer will share the theory behind every theme and would also demonstrate the same on a model. The theory part includes an extensive compendium and oral lectures where focus is on styles, techniques, products, product ingredients and much more.

Practical

They say practice is the basic formula to hone any skill and make up is no exception. Once the theory part is completed; the students will be divided in pairs or groups and would be assigned pre-decided assignments to help them practice the theory they just learnt. The trainer follows, corrects and supervises the students' work on both models and face charts.

Evaluations and exams

Every student would go through a theory as well as practical exam where their work would be evaluated and professional photographs are taken for the students' portfolios.

It's not about who tops the class but without putting the skills to the test, it will be difficult even for the student to know where they stand with respect to their skill level. Every student will be evaluated in theoretical knowledge, practical skills and creativity.

Diploma, portfolio and the future

All the students who passed successfully are provided with Diploma and their respective portfolios pictures. Being in the industry and having a reputed name as an academy, we get a lot of enquiries and we try to help you further your career as a professional artist.

BASIC TO ADVANCE MAKEUP + BASIC HAIRSTYLING
